

ADVANCED SECURITY ENHANCEMENTS

FOR EVEN MORE ROBUST

END-TO-END DATA PROTECTION

Overland Storage® Announces the Snap Server® 620 and NAS Software Innovations for Enhanced Productivity and Increased Security

Snap Server® 620:

- AMD Dual-core Opteron Processor for Enhanced File Serving
- 63% Higher Performance Over That of the Snap Server 520
- Dual Power Redundancy (Optional)
- Hot-swappable Disk Drives

GuardianOS™ 5.0:

- Rock-Solid Operating System for Snap Server Platforms
- Advanced Windows ACLs Support and Enhanced Cross-platform Security Enforcement
- Support Added for RAID Levels 6 and 10 for Advanced Data Protection
- Dynamic Home Directory Support

Snap Enterprise Data Replicator™ (Snap EDR):

- Three Levels of Configurable Security; User Access Rights, Mutual Authentication, and In-transit Data Encryption (up to AES 256-bit)
- Multi-Platform Support (Windows, Linux, Solaris, Mac)
- Transfers Only Byte-Level Changes in Files

BakBone NetVault: Backup 8.1

- Scales to Meet Backup Requirements from Small Workgroups to Corporate Environments
- Disk-to-Disk-to-Tape Capabilities for Advanced Data Protection
- Multi-platform Support to Enable Backup of Structured and Unstructured Data Environments
